4.2.1- Library automation

The library automation is the use of automatic and semi-automatic library activities as acquisition, cataloguing, and circulation. Library automation' is used to imply just the mechanization of traditional and/ormanual house–keeping routines of a library.

Our college established in 1989 with one post of Librarian and one post of book-lifter. Since then, there are nearly 22,000 books.

There is no formal software purchased and installed in the library of college. However semiautomation is inprogress.

The process of doing semi automating in library is being done by manual entry of books in the excel-sheet. From this process, the library records for issue of books to student and its return to library will be easier.

From this process following may be possible:

- (1) Maintaining the Issue records of books
- (2) Listing of books by Authors name
- (3) Listing of books by Publishers
- (4) Listing of books by Price
- (5) Listing of books by subject-wise
- (6) Listing of books by Item-wise, i.e., UGC, Book-Bank, SC/ST etc.
- (7) Receipt and Billing records may be maintained.
